ACADEMIC FEST 2018-2019

"IGNITING A PASSION FOR NUMBERS IN ANGELS"

REPORT

Venue : CRD- Block Seminar Hall

Date : 16.08.2018

Department of Mathematics organized an academic fest entitled "IGNITING A PASSION FOR NUMBERS IN ANGELS" on 16.08.2018. The programme began with the invocation followed by the welcome address by Dr. S. Subramaniam, Head of Department of Mathematics. Dr.V.Ramadass, Professor, Department of Mathematics, PRIST Deemed to be University, Thanjavur was the resource person. He discussed about the Igniting passion for the numbers in angles and its system with the students that the Self-esteem underscores confidence in one's beliefs and values. It emerges from attitudes that a person develops towards something, which could be a personal vision such as career objectives, lifestyles, and other personal responsibilities.

Every Student gave good response to this interactive session. The programme ended with the vote of thanks delivered by Dr.R. Balakumar, Assistant professor of Mathematics.

MIND DEVELOPMENT ACTIVITIES

FACULTY NAME : DR.R.MANIKANDAN

DEPARTMENT : CHEMISTRY

TOPIC : MENTORING RELATIONSHIP

This is to report that on 17th October 2019 I have done an activities about "Mentoring Relationship". Peer mentoring aims to enhance supportive relationships between staff and students to share knowledge and experience and providing an opportunity to learn from different perspectives Build trust. The key element for mentoring is First and foremost, there must be trust between the mentee and mentor. Establish goals and share lessons learned. Take action and Celebrate successes. Peer mentoring may help new students adapt to a new academic environment faster. The relationship between the mentor and mentee gives the mentee a sense of being connected to the larger community where they may otherwise feel lost. Mentors are chosen because they are academically successful and because they possess good communication, social and leadership skills. As a consequence, mentors serve as positive role models for the students, guiding them towards academic and social success. Mentors provide support, advice, encouragement, and even friendship to students. Peer mentoring may improve student retention rates.

Mentors also stand to benefit from the mentor/mentee relationship. Mentors develop friendships through their participation in mentoring programs and usually derive satisfaction from helping a younger student, and possibly shaping his or her life in a positive way.

Webinar on Human Vision vs Computer vision

which offers a refined human eye sensor model and provides access to the human vision algorithm for luminance and immersive 360-degree observer results. The purpose of SPEOS' Human Vision simulation feature is to overcome classical display limitations in terms of luminance dynamic range. Human Vision smartly adapts the displayed luminance and contrast, enabling visualization of key details that would be seen in the real world, then emulating physiological properties of the human eye like the glare, depth of field, acuity and temporal adaptation. In turn, the simulation matches the appearance of product designs, based on spectral luminance results, algorithms for the dynamic adaptation and glare aspects of human vision — while considering the limitations of display capabilities. This enables users to evaluate and improve their designs to achieve quality levels for homogeneity, color differences and stray light issues.

Attend this webinar to explore best practices for SPEOS' human vision simulation:

- Understand monitor display capabilities, how to maximize their use and how to increase reliability across different monitors through calibration.
- Learn how to configure and optimize SPEOS Lab viewer preferences to enable 1:1 luminance matching.

Determine the best settings for the simulation and the viewing environment to ensure a reliable displayed result that replicates physical prototypes.

Webinar on Computer Vision

Computer vision: Tasks include methods for acquiring, processing, analyzing and understanding digital images, and extraction of high-dimensional data from the real world in order to produce numerical or symbolic information, e.g. in the forms of decisions. Understanding in this context means the transformation of visual images (the input to the retina in the human analog) into descriptions of the world that make sense to thought processes and can elicit appropriate action. This image understanding can be seen as the disentangling of symbolic information from image data using models constructed with the aid of geometry, physics, statistics, and learning theory.

Computer vision :

Computer vision is defined as a solution that leverages artificial intelligence (AI) to allow computers to obtain meaningful data from visual inputs. The insights gained from computer vision are then used to take automated actions. This article details the meaning, examples, and applications of computer vision.

What Is Computer Vision?

Computer vision leverages artificial intelligence (AI) to allow computers to obtain meaningful data from visual inputs such as photos and videos. AI gives computers the ability to 'think', computer vision allows them to 'see'.

Human Vision vs. Computer Vision

As humans, we generally spend our lives observing our surroundings using optic nerves, retinas, and the visual cortex. We gain context to differentiate between objects, gauge their distance from us and other objects, calculate their movement speed, and spot mistakes. Similarly, computer vision enables AI-powered machines to train themselves to carry out these very processes. These machines use a combination of cameras, algorithms, and data to do so.

However, unlike humans, computers do not get tired. You can train machines powered by computer vision to analyze thousands of production assets or products in minutes. This allows production plants to automate the detection of defects indiscernible to the human eye.

Computer vision needs a large database to be truly effective. This is because these solutions analyze information repeatedly until they gain every possible insight required for their assigned task. For instance, a computer trained to recognize healthy crops would need to "see" thousands of visual reference inputs of differentiate them from unhealthy crops, gauge farmland quality, detect pests and other animals among the crops, and so on.

Machine learning (ML) leverages algorithm-based models to enable computers to learn context through visual data analysis. Once sufficient data is provided to the model, it will be able to "see the big picture" and differentiate between visual inputs. Instead of being programmed to recognize and differentiate between

two-dimensional world. This 2D model is partitioned into a grid of dense spatial cells. Each cell represents a unique ground point on the field, shown as a fixed image patch in the video.

SeattleScope is powered by machine learning and trained with more than 100,000 player samples. This enables it to detect 'player' cells in the footage of soccer games. The probabilistic algorithm can function in numerous types of challenging visibility conditions.

Seattle is one of the many companies working to infuse computer vision with sports training regimens. These solutions usually analyze live feeds from high-resolution cameras to track moving balls, detect player positions, and record other useful information that one can use to enhance player and team performance.

What is AI and ML

Many companies will market their systems or services as "powered by AI" when it's not often the case. We will always find these instances of gimmicky marketing, so it is helpful to first understand what is AI and ML, and the different terms, as there are many relevant use cases of AI and ML in our world today.

Artificial Intelligence is a technique for building systems that mimic human behavior or decision-making.

Machine Learning is a subset of AI that uses data to solve tasks. These solvers are trained models of data that learn based on the information provided to them. This information is derived from probability theory and linear algebra. ML algorithms use our data to learn and automatically solve predictive tasks.

Deep Learning is a subset of machine learning which relies on multilayered neural networks to solve these tasks.

Course Outline

The primary objective of this course is

- To introduce the basic principles, techniques, and applications of Artificial Intelligence.
- Emphasis will be placed on the teaching of these fundamentals, not on providing a mastery of specific software tools or programming environments.
- Assigned projects promote a 'hands-on' approach for understanding, as well as a challenging avenue for exploration and creativity.
- scope, potential, limitations, and implications of intelligent systems.

Forms of Machine Learning

Given that machine learning is a fundamental basis for AI, it's worthwhile to understand the different forms of machine learning.

Supervised Machine Learning

In supervised machine learning, we know about the data and the problem. Think of it as, "given a set of features x , we know the value of y ," and so in supervised learning, we create a function that approximates results based on some set of data.

Unsupervised Machine Learning

In unsupervised machine learning, our data is unlabelled. There are two forms of unsupervised machine learning:

Clustering and dimension reduction.

Reinforcement Learning

REGISTRAR,
Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),

In reinforcement learning (RL), we are learning models over time. A common technique is to utilize deep learning with reinforcement learning to derive relationships between features of a data set that may not otherwise be solved through human research.

Future Scope

On completion of the course, students can adopt industry careers related to innovation and problem solving using artificial Intelligence (AI) and Machine Learning (ML) technology and study careers in AI, ML, and an area of General Computer Science. In artificial intelligence, job openings are growing quicker than job seekers. However, there's a lack of skilled professionals and there may be an urgent need for getting ready nowadays era with skillsets in AI and ML.

Course Outcomes

Upon successful completion of this course, the student shall be able to:

- 1) Demonstrate fundamental understanding of the history of artificial intelligence (AI) and its foundations.
- 2) Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning.

Real-time machine learning

Real-time machine learning involves continuously training a machine learning model with live data instead of relying on historical testing data in an offline mode. This approach is practical when limited initial data is available for training or when the data needs to adapt to new patterns.

Real-time machine learning involves:

- Deploying machine learning models into production environments.
- Receiving live data.
- Continuously updating the model's predictions.

The technologies used to make Real-time Machine Learning?

The scenario involves building an app that utilizes machine learning to learn from user data in real time. The data is first streamed in real-time using Apache Kafka software to a model built and trained using the Spark library. While these specific technologies are not mandatory, they are commonly used for this use case.

Applying an ML model to the feature vector for prediction is crucial when responding to real-time requests using machine learning. However, using Golang can complicate things. Different approaches can be taken, such as using an -

- Inference endpoint
- Custom application code
- Cross-runtime algorithms
- Portable model formats

Criteria for real-time:

There are two evaluation criteria for real-time processing in general,

- **Faster data collection/processing:** This heavily depends on the infrastructure to collect and process the incoming data to be able to feed to the model as input features. For example, the data streaming from Apache Kafka/Kinesis should appropriately be handled and processed by stream processing engines like Apache Flink, Beam, Storm, Spark etc. The infrastructure and framework that supports maximum through must be chosen for real-time processing.
- **Faster data consumption:** This depends on achieving low latency and high throughput on the consumption side of the resultant data from the model. For example, the model serving infrastructure that produces/pulls model scores for the real-time requests should minimize the latency and maximize the throughput overall by considering caching layer for inferences(Prediction Store).

Types of real-time model processing:

When it comes to the real-time model processing, there are two types we can consider processing.

1. **Online scoring:** This produces in-session model inferences for the real-time requests/features from the consumption side.
2. **Online training/learning (continual learning):** This produces online training of a model to change/fine-tune weights and remodel/gain new learnings .

ACADEMIC FEST 2018-2019

BRAIN'18 REPORT

The Department of Computer Science conducted Paper Presentation named BRAIN'18 (which sounds festival with the full of Mysteries and Intelligence) for the year 2018-2019 on 14.12.2018.

The Grand Session began with its Inaugural function conducted by Computer science Association at 9.30A.M. Mr.S.Stephen Raj, Director, Ads-E-Park, Chennai the Chief Guest for that occasion. The other dignitaries include Dr.K.Saravanan (DEAN and Head of the Department, Computer science), Faculty members and other department teaching and non-teaching faculty members.

It started with the auspicious note of invoking the almighty in the form of prayer song sung by Dr.GPreethi and G.Gayathri which was followed by lighting the kuthuvilakku by the dignitaries. The DR.P.Sathya welcomed the august gathering by her universal welcome address.

Dr. K.Saravanan, The Dean spreaded her goodness by her intellectual presidential address. She motivated the students to participate in all the events conducted by the colleges. His speech made the students to think out of the box.

Followed by, Prof.P.Karthik, delivered the felicitation address. His speech composed of the achievements made by the students of the department and also the efforts taken to improve their skills by the department.

Prof.G.Gayathri, Staff Coordinator of Symposium delivered her insight of the day by her speech about IOT. She gave a knowledgeable address for the gathering by her explanation about IOT events.

The introduction to Chief Guest was given by Mr.S.Vijay (student).

Mr.S.Stephen Raj, the Chief Guest gave the inaugural address. He motivated the students to become a program developer. He gave energy and enthusiasm to the gathering by his precious words. His speech helped the students for their holistic development.

The Paper Presentation started with its technical and non-technical events by 10.30A.M.

Valedictory was conducted around 4.00 P.M. Valuable feedback was given by the participants from other colleges. The Winners of the events conducted were appreciated by awards and prizes by the dignitaries. The occasion was ended with National Anthem to expose the patriotism.

Prof.P.Karthik and DR.P.Sathya were the emcee for the Grand occasion.

Innovate fest

2018-2019

The school of commerce and management department of commerce arrangement of Academic cultural activities in Innovate fest 2k18 provide opportunities to the students to express themselves, build confidence, increase capabilities to work in team and develop social skills that are essential for their overall development. Cultural activities are an important part of the education system. According to the research by the National Center for Education Statistics, participation in cultural activities enhances students' sense of engagement and attachment to their institutions and improves their performance in academics, it also helps students to explore their potential and excel themselves in various fields. Keeping in view the importance of cultural Activities University has been providing opportunity to the students to showcase their talent in cultural activities as a regular feature at PRIST Deemed to be university values . A student participate in various cultural programmes and exhibits their talent as Dancing, Singing, Literary, Fine Arts, Enacting, Poem Recitation, Instrument Playing, One minute show, Mime, Folk Dance, Debate, Poster Competition etc. Activities like are also organized by university students to create awareness among rural people of adopted village in order to give them knowledge about various topics. The following activities were organized on regular basis, while others cultural events were organized as per guidelines.

SCHOOL OF AGRICULTURE

About the programme:

Landscape requires a certain understanding of horticulture and artistic design, but is not limited to plants and horticulture. Sculpting land to enhance usability (patio, walkways, ponds, water features) are also examples of landscaping being used. When intended as purely an aesthetic change, the term Ornamental Landscaping is used. So in this webinar we learn about the brief amount of landscaping

Scope of Landscaping:

The scope of the profession is broad and can be subdivided into several sub-categories including professional or licensed landscape architects who are regulated by governmental agencies and possess the expertise to design a wide range of structures and landforms for human use; landscape design which is not a licensed profession; site planning; stormwater management; erosion control; environmental restoration; public realm, parks, recreation and urban planning; visual resource management; green infrastructure planning and provision; and private estate and residence landscape master planning and design; all at varying scales of design, planning and management.

Nature of work

Landscape Architects are generally required to have university or graduate education from an accredited landscape architecture degree program, which can vary in length and degree title. They learn how to create projects from scratch, such as residential or commercial planting and designing outdoor living spaces they are willing to work with others to get a better outcome for the customers when doing a project; they will have to learn the basics of how to create a project on a manner of time and will require to get your license in a certain state to be allowed to work; students of Landscape Architects will learn how to interact with clients and will learn how to explain a design from scratch when giving the final project

Applications

A planting plan gives specific instructions, often for a contractor about how the soil is to be prepared, what species are to be planted, what size and spacing is to be used and what

maintenance operations are to be carried out under the contract. Owners of private gardens may also use planting plans, not for contractual purposes, as an aid to thinking about a design and as a record of what has been planted. A planting strategy is a long-term strategy for the design, establishment and management of different types of vegetation in a landscape or garden.

Planting can be established by directly employed gardeners and horticulturalists or it can be established by a landscape contractor (also known as a landscape gardener). Landscape contractors work to drawings and specifications prepared by garden designers or landscape architects.

About the Programme

This webinar on public charging infrastructure in the frame of the GEF Global e-mobility programme's Working Group 4 on charging and grid integration.

The webinar will address public charging infrastructure roll-out strategies and regulatory measures to enable successful business models. Expert presentations will allow listeners to understand the strategies for the deployment of public charging infrastructure and identify relevant business models. The presentations will be followed by a panel discussion with a focus on infrastructure deployment in emerging economies.

Bringing energy, mobility and real estate business leaders together to propose a common vision of interconnected system that can improve the business case for charging infrastructure deployment and catalyze EV market growth.

The potential of electric vehicles

EVs have great potential as a way for cities to reduce local air pollution, greenhouse gas emissions and transport sector oil use. When powered by renewable energy, EVs can produce zero emissions at the vehicle tailpipe and much lower life-cycle emissions. However, they still contribute to congestion and air pollution due to particles released from tyres and braking. Therefore, a shift to EVs should be positioned within a wider plan for most city journeys to be made by public transport, bike or on foot.

About the Programme

In this programme, we have addressed the question of How to Write a Final Year Project Report. We have presented an elaborative structure for a final year project report. The tips and structure given in this article can be used by the final year students to write an effective Final Year Project Report.

The body of your paper will, of course, develop and explain these ideas much more fully. As you will see in the samples below, the proportion of your abstract that you devote to each kind of information—and the sequence of that information—will vary, depending on the nature and genre of the paper that you are summarizing in your abstract. And in some cases, some of this information is implied, rather than stated explicitly. *The Publication Manual of the American Psychological Association*, which is widely used in the social sciences, gives specific guidelines for what to include in the abstract for different kinds of papers—for empirical studies, literature reviews or meta-analyses, theoretical papers, methodological papers, and case studies.

National Conference
Bharath College of Science and management
25 -26th Jan 2020

Number of students participated	: 01
Number of students participated from other departments	: 02
Number of faculty participated	: 02
Outcome of the event:	

Under graduate students from department of Microbiology, Biochemistry and Biotechnology participated and presented a paper on Diet and Cancer "National Conference" Bharath College of Science and management. The challenge faced by the science stream students and life science in working environment. They have gain the presentation skill and research activities.

B.N. Shwetha, III. B.Sc Microbiology student got Best presentation Award (2nd prize)

About the Programme

Renewable energy is derived from natural sources that are replenished at a higher rate than they are consumed. Sunlight and wind, for example, are such sources that are constantly being replenished. Renewable energy sources are plentiful and all around us. Bringing energy, mobility and real estate business leaders together to propose a common vision of interconnected system that can improve the business case for charging infrastructure deployment and catalyze EV market growth.

Benefits of Renewable Energy

The advantages of renewable energy are numerous and affect the economy, environment, national security, and human health.

- Enhanced reliability, security, and resilience of the nation's power grid
- Job creation throughout renewable energy industries
- Reduced carbon emissions and air pollution from energy production
- Increased U.S. energy independence
- Increased affordability, as many types of renewable energy are cost-competitive with traditional energy sources
- Expanded clean energy access for non-grid-connected or remote, coastal, or islanded communities.

Declared as DEEMED-TO-BE-UNIVERSITY
U/s 3 of UGC Act, 1956

SCHOOL OF ENGINEERING AND TECHNOLOGY DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

About the Programme

Electricity has practically revolutionized our lives so strongly that we cannot imagine our lives without this 'once-called luxury.'

Wireless power techniques fall into two categories: non-radiative and radiative. In non-radiative technologies, power is typically transferred by magnetic fields using magnetic inductive coupling between coils of wire. Applications of this type include electric toothbrush chargers, RFID tags, smart cards, and chargers for implantable medical devices like artificial cardiac pacemakers, and inductive powering or charging of electric vehicles like trains or buses.

A current focus is to develop wireless systems to charge mobile and handheld computing devices such as cell phones, digital music players, and portable computers without being tethered to a wall plug. Power may also be transferred by electric fields using capacitive coupling between metal electrodes. These techniques can transport energy longer distances but must be aimed at the receiver. Proposed applications for this type are solar power satellites and wireless powered drone aircraft.

Reduces costs associated with maintaining direct connectors

- Greater comfort for the charging of everyday electronic devices
- Safe power transfer to applications that need to remain sterile or hermetically sealed
- Electronics can be fully enclosed, reducing the risk of corrosion due to elements such as oxygen and water.

From

The Head,
Department of Mathematics,
PRIST Deemed to be University,
Thanjavur,

To

The Registrar,
PRIST Deemed to be University,
Thanjavur,

Respected sir

Sub: Requesting Permission to conduct "Igniting a enthusiasm for facts in Angels" for the Students of Mathematics Department, School of Arts and Science, reg.

Department of Mathematics has planned to organize academic fest entitled by "Igniting a enthusiasm for facts in Angels" for the students of Mathematics Department on 16.08.2019 for the academic year 2019 - 2020. So, I request you to give us permission to conduct the programme.

Thanking you,

Dean
School of Arts & Science
Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST)
Deemed to be University
Vallam, Thanjavur - 613 403.

Yours faithfully,

ACADEMIC FEST 2019-2020

"IGNITING AN ENTHUSIASM FOR FACTS IN ANGELS"

REPORT

Venue : CRD- Block Seminar Hall

Date : 16.08.2019

Department of Mathematics organized an academic fest entitled "Igniting an enthusiasm for facts in Angels" on 16.08.2019. The programme began with the invocation followed by the welcome address by Dr. S. Subramaniam, Head of Department of Mathematics. Dr.V.Ramadass, Professor, Department of Mathematics, PRIST Deemed to be University, Thanjavur was the resource person. He discussed about the Igniting an enthusiasm for the numbers in angles and its system with the students that the Self-esteem underscores confidence in one's beliefs and values. It emerges from attitudes that a person develops towards something, which could be a personal vision such as career objectives, lifestyles, and other personal responsibilities.

Every Student gave good response to this interactive session. The programme ended with the vote of thanks delivered by Dr.R. Balakumar, Assistant professor of Mathematics.

Programme Report

The Biotechnology Department hosted an **ACADEMIC FEST - 2019**, for 98 students in total, along with staff members from several departments. The greeting speech delivered by Dr. S. Ambiga, Head of the Biochemistry Department of PRIST University. Dr. L. Chinnappa, professor and dean of PRIST Deemed to be University, Vallam, Thanjavur, delivered the presidential speech. Resource: **Dr. A. Nirmalram**, Scientist, CRD, PRIST Deemed to be University, Vallam, Thanjavur, of PRIST Deemed to be University's school of education at Vallam, Thanjavur. The event was beneficial to the students and given the in-depth discussions between the students and resource persons, it exposed the staff to skill development and capacity development for their future prospect. Dr. S. Arunkumar, Assistant Professor, Department of Biotechnology, PRIST Deemed to be University, Vallam, Thanjavur, finally offered a vote of gratitude.

TOPIC : MENTORING RELATIONSHIP

This is to report that on 17th October 2019 I have done an activities about "Mentoring Relationship". Peer mentoring aims to enhance supportive relationships between staff and students to share knowledge and experience and providing an opportunity to learn from different perspectives Build trust. The key element for mentoring is First and foremost, there must be trust between the mentee and mentor. Establish goals and share lessons learned. Take action and Celebrate successes. Peer mentoring may help new students adapt to a new academic environment faster. The relationship between the mentor and mentee gives the mentee a sense of being connected to the larger community where they may otherwise feel lost. Mentors are chosen because they are academically successful and because they possess good communication, social and leadership skills. As a consequence, mentors serve as positive role models for the students, guiding them towards academic and social success. Mentors provide support, advice, encouragement, and even friendship to students. Peer mentoring may improve student retention rates.

Mentors also stand to benefit from the mentor/mentee relationship. Mentors develop friendships through their participation in mentoring programs and usually derive satisfaction from helping a younger student, and possibly shaping his or her life in a positive way.

TOPIC : FLIP MOOD ACTIVITY

Flip Mood activity is the best way to stay cheerful and centered in the present. In contrast wandering mind and day dreaming can bring people down. Being nice can help us feel nicer and holding the door for the person behind you. I have conducted Flip Mood activity for UG & PG Students with puzzles and dumb charades games. Prize and certificates also distributed to Students.

**SCHOOL OF COMMERCE AND MANAGEMENT
DEPARTMENT OF COMMERCE
INNOVATE FEST
2019-2020**

The school of commerce and management department of commerce arrangement of Academic cultural activities in Innovate fest 2k19 provide opportunities to the students to express themselves, build confidence, increase capabilities to work in team and develop social skills that are essential for their overall development. Cultural activities are an important part of the education system. According to the research by the National Center for Education Statistics, participation in cultural activities enhances students' sense of engagement and attachment to their institution and improves their performance in academics, it also helps students to explore their potential and excel themselves in various fields. Keeping in view the importance of cultural Activities University has been providing opportunity to the students to showcase their talent in cultural activities as a regular feature at PRIST Deemed to be university vallam . A student participate in various cultural programmes and exhibits their talent in Dancing, Singing, Literary, Fine Arts, Enacting, Poem Recitation, Instrument Playing, One minute show, Mime, Folk Dance, Debate, Poster Competition etc. Activities like are also organized by university students to create awareness among rural people of adopted village in order to give them knowledge about various topics. The following activities were organized on regular basis, while others cultural events were organized as per guidelines.

Sub: One day webinar on "Spirulina cultivation"

It is informed that a one-day webinar programme on "Spirulina cultivation" be arranged by the School of Agriculture on 18/09/2019 for the academic year 2019-20. Heads of the respected department are requested to inform their students to attend the programme. HODs are also requested to nominate one faculty member to co-ordinate the same.

About the programme:

Spirulina cultivation is a fascinating blend of biology, technology, and sustainability. Spirulina is a type of blue-green algae known for its rich nutritional profile, including high levels of protein, vitamins, minerals, and antioxidants. It's often used as a dietary supplement and has potential applications in agriculture, nutrition, and even space travel due to its efficiency in producing nutrients with minimal resources. So in this webinar we learn about the methods of spirulina cultivation and post harvesting benefits.

Benefits of spirulina:

Nutritional Powerhouse

- **High-Quality Protein:** Spirulina is a complete protein, meaning it contains all essential amino acids. It provides about 60-70% protein by weight, making it an excellent source for those on plant-based diets. Its protein content is comparable to animal sources but without the saturated fats.
- **Rich in Vitamins:** Spirulina is a good source of several vitamins, including B vitamins (B1, B2, B3, B5, B6, B7, B9, and B12), vitamin C, and vitamin E. B vitamins are crucial for energy production, brain function, and red blood cell formation.

Health Benefits

Supports Heart Health: Spirulina may contribute to heart health by reducing cholesterol levels, particularly LDL (bad cholesterol) and triglycerides, while increasing HDL (good cholesterol). It also helps lower blood pressure, which can reduce the risk of cardiovascular diseases.

- **Improves Digestion:** Spirulina has a good balance of protein, fibre, and other nutrients that can aid digestion and support a healthy gut microbiome. Its high fibre content helps maintain bowel regularity and may alleviate constipation.
- **Enhances Mental Health:** The nutrients in spirulina, including B vitamins and antioxidants, support brain health and may improve cognitive function. Some studies suggest it can help reduce symptoms of anxiety and depression.

Potential Applications

- **Sports and Fitness:** It can support muscle recovery, boost endurance, and improve overall physical performance.
- **Weight Management:** Spirulina may aid in weight management by promoting a feeling of fullness and reducing appetite.

Considerations

While spirulina offers numerous benefits, it's essential to consider the following:

1. **Quality and Source:** The quality of spirulina can vary based on its source and production methods. It's crucial to choose products from reputable manufacturers to ensure purity and avoid contamination with toxins.

2. **Allergies and Sensitivities:** Some individuals may experience allergic reactions or sensitivities to spirulina. It's advisable to start with a small amount and consult with a healthcare provider if you have any concerns.

3. **Interactions with Medications:** Spirulina can interact with certain medications, including blood thinners and immunosuppressants. It's important to consult a healthcare provider before adding spirulina to your diet if you're on medication or have any underlying health conditions.

In summary, spirulina is a nutrient-dense superfood with a range of health benefits, from boosting the immune system to supporting heart, health and mental well-being. Its versatility makes it a valuable addition to a balanced diet, but as with any supplement, it should be used wisely and in conjunction with a healthy lifestyle.

About the Programme

Electricity theft can be termed as fraud which can be in the form of meter tampering, illegal connections, billing irregularities and unpaid bills. The financial records indicate that most of the theft of electricity is in the form of stealing of power. In modern electronic meters, meter tampering and magnetic locking cannot be done. Hence now a days the most common type of power theft is done by hooking directly from the distribution lines. Electricity consumer dishonesty is a problem faced by all power utilities. Finding efficient measurements for detecting fraudulent electricity consumption has been an active research area in recent years. This project focusses on the detection of unofficial power consumption and high lightening some ways to prevent power theft.

- **Power Tapping:** Power theft is frequently committed during transmission by illegally tapping power lines to divert power to the required destinations. It is also done through illegal connections to power grid stations, which are cut during billing.
- **Meter fraud:** In many areas where meter readings are done manually, the person is frequently bribed to give false readings, and thus the amount paid is for less power than is actually consumed. Meters are also tampered with by obstructing the movement of the disc (usually electro-mechanical consists of slowly spinning discs to record the power consumed).

About the Programme

The vehicle is to be used in the Shell Eco-marathon competition, engineering standards are written in the rulebook for the urban concept division. With the goal of designing an energy efficient vehicle, matters such as safety, connections for equipment, size limits, visibility are all considered. If these constraints are not met, the vehicle will not be permitted in the Shell Ecomarathon race in the future. Spatial constraints were of primary concern during the design phase. Since material was purchased by previous teams, frame design and fabrication were started before the complete model was finished; therefore, when designing the various systems of the vehicle, the designer would need to check the frame model to assure that interference with the frame was not occurring. This added one more factor to consider during the design process.

Since combustion engines never achieve complete combustion, resulting extraneous gases add to the problem of global warming. Electric motors produce zero emissions; therefore, the application of urban electric driven vehicle will dramatically decrease the amount carbon dioxide (CO₂) contributing to global warming. One other environmental factor should be considered when weighing the switch from combustion engines to electric motors. Electric motor drives require a power source. Due to the need to apply many life cycles to the battery and the need for lightweight application, the use of lithium ion batteries are inevitable. Lithium is a rare-Earth element which produces considerable waste water to obtain. This would result in a negative impact on the environment. Regulations should be in place to minimize the amount of waste water for lithium harvesting.

About the Programme

Electricity theft can be termed as fraud which can be in the form of meter tampering, illegal connections, billing irregularities and unpaid bills. The financial records indicate that most of the theft of electricity is in the form of stealing of power. In modern electronic meters, meter tampering and magnetic locking cannot be done. Hence now a days the most common type of power theft is done by hooking directly from the distribution lines. Electricity consumer dishonesty is a problem faced by all power utilities. Finding efficient measurements for detecting fraudulent electricity consumption has been an active research area in recent years. This project focusses on the detection of unofficial power consumption and high lightening some ways to prevent power theft.

- ❖ **Power Tapping:** Power theft is frequently committed during transmission by illegally tapping power lines to divert power to the required destinations. It is also done through illegal connections to power grid stations, which are cut during billing.
- ❖ **Meter fraud:** In many areas where meter readings are done manually, the person is frequently bribed to give false readings, and thus the amount paid is for less power than is actually consumed. Meters are also tampered with by obstructing the movement of the disc (usually electro-mechanical consists of slowly spinning discs to record the power consumed).

One other environmental factor should be considered when weighing the switch from combustion engines to electric motors. Electric motor drives require a power source. Due to the need to apply many life cycles to the battery and the need for lightweight application, the use of lithium ion batteries are inevitable. Lithium is a rare-Earth element which produces considerable waste water to obtain. This would result in a negative impact on the environment. Regulations should be in place to minimize the amount of waste water for lithium harvesting.

SUB: WEBINAR ON “EURASIA TUNNEL”

It is informed that **WEBINAR ON “EURASIA TUNNEL”** will be held on 23.07.2020 for the academic year 2020-2021. The detailed schedule will be given by the department. Heads of the departments are requested to inform their students about the **WEBINAR ON EURASIA TUNNEL** and motivate them to attend the class. HODs are also requested to nominate one faculty member to co-ordinate the same.

SCHOOL OF ENGINEERING AND TECHNOLOGY

DEPARTMENT OF CIVIL ENGINEERING

About the Programme

First road tunnel construction across the Bosphorus linking Europe and Asia: innovation and international collaboration to solve technical challenges. Turkey. International Tunnelling Association (ITA) - Tunnelling Project of the Year, 2015. Engineering News-Record (ENR) - Global Best Project, Bridge/Tunnel, 2016. One Tunnel to Connect Two Continents. The only city settled on two continents, the city of Istanbul dates back to 660 BC and is now one of the most populous in the world with over 15 million people. The first road tunnel crossing of the Bosphorus in Turkey will provide an important transportation link between the European and Asian sides of Istanbul, reducing travel time from 100 minutes to 15 minutes. It is part of a 9 mile (14.6 kilometres) highway project. Complex Conditions Call For Innovation and Collaboration. Four lanes of roadway will pass in stacked upper and lower decks through 3.3 miles (5.4km) of tunnel. This includes a 45 foot diameter (13.7 metre) bored submarine tunnel over 2 miles (3.4km) long and twin New Austrian Tunnelling Method (NATM) tunnels, each 0.6 miles (1 km). At depths of 330 feet (100m) below the water surface, in sand and gravel, the single pass segmental lining will be required to resist 11 bars of water pressure and large seismic forces. Construction also requires tunnelling through poor quality rock at both the Asian and European sides of the crossing, and mixed-face conditions beneath the Bosphorus. Special attention had to be given to design of the bored tunnel lining segments, gaskets, and bolted connections. The significant technical challenges faced by the designers and builders are coupled with both obstacles and opportunities brought together by the multinational design and construction teams. The design and construction coordination was accomplished with support by staff in Turkey, Korea, Great Britain, Austria, and the United States. The construction drawings were bilingual, Turkish and English; and the design was required to meet Turkish, European, and American codes.

SUB: WEBINAR ON “USE OF E-WASTE IN CONCRETE”

It is informed that **WEBINAR ON “USE OF E-WASTE IN CONCRETE”** will be held on 25.02.2021 for the academic year 2020-2021. The detailed schedule will be given by the department. Heads of the departments are requested to inform their students about the **Webinar On “USE OF E-WASTE IN CONCRETE”** and motivate them to attend the class. HODs are also requested to nominate one faculty member to co-ordinate the same.

Head of the Department

DEPARTMENT OF CIVIL ENGINEERING

About the Programme

- The idea of managing and recycling electronic waste is getting broad acceptance because it is a resource that is rapidly available in bulk, contains various hazardous substances and has a low recycling rate. Meanwhile, increasing industrialization and urbanization has increased concrete production and consumption, resulting in environmental problems via resource depletion. As a result, the utilization of aggregates prepared from e-waste is a viable solution to different conservation and environmental issues caused by e-waste and concrete production. This article discusses the types of e-waste and types and production techniques of e-waste aggregates (e-waste plastic and cathode ray tube (CRT) glass). The primary focus of this article is the influence of e-waste aggregates on the properties of concrete, including workability, fresh and dry density, compressive strength, flexural strength, splitting tensile strength, and thermal resistance. Moreover, this study also discusses the suitable percentages of e-waste aggregates that can be incorporated as natural coarse aggregates to prepare sustainable concrete for structural and nonstructural purposes. It can be concluded that e-waste modified concrete provide a glimmer of hope for the safe and sound disposal of increasing quantity of e-waste. However, more comprehensive experimental studies are required to explore full potential of e-waste aggregates as natural coarse aggregates replacement for the large-scale production of concrete. The disposal of toxic e-waste in landfill sites causes irreplaceable health and environmental hazards. Therefore, reusing raw materials obtained from e-waste recycling is the most viable solution to reduce the substantial growth in e-waste.

Incorporation of manufactured e-waste plastic, SG, and CG aggregates increases the workability of concrete owing to their smooth surface texture. However, using unmanufactured e-waste

REGISTRAR,

THANJAVUR - 613 403, TAMIL NADU.

plastic aggregates can decrease the workability of concrete because they (e-waste aggregates) entrap available moisture in created voids, which is required for concrete to flow.

The mechanical properties (e.g., compressive strength, flexural strength, and splitting tensile strength) of concrete containing e-waste plastic aggregate decrease at higher e-waste aggregate replacement levels owing to the lower density of e-waste aggregates and increased porosity of the concrete matrix. Increasing the amount of e-waste plastic aggregates leads to high reduction in mechanical properties of concrete. However, using low w/c ratio to prepare concrete with e-waste plastic aggregates can decrease the reduction in mechanical properties (particularly compressive strength).

Like e-waste plastic aggregates, incorporation of SG or/and CG also pose detrimental impact on the mechanical properties of concrete, which can be attributed to their smooth surface and similar size (particularly SG). However, the negative impact of SG/CG on the mechanical properties of concrete is not significant like e-waste plastic aggregate. The decrease in mechanical properties of SG and CG modified concrete can be countered by using both CG and SG in different proportions because it will ultimately get maximum benefits via the properties of the mentioned glass types or will negate their deficiencies.

The fresh and dry properties of concrete with e-waste aggregates can be enhanced with admixtures (like fly ash and steel slag), superplasticizer, and biomineralization. However, more data is necessary to estimate the long-term performance potential of e-waste incorporated concrete.

The availability of limited data on the impact of e-waste on the engineering properties of concrete suggests in-depth analysis of e-waste modified concrete should be investigated comprehensively by incorporating various factors, i.e., w/c ratio, concrete type, cement type, curing and environmental conditions. This will enable concrete technologists to conclude whether e-waste aggregates are suitable replacements for coarse aggregates in the preparation of concrete.

E-waste modified concrete has the potential to decrease the thermal conductivity due to its lower density, which makes it a suitable material for energy conservation in buildings. However,

THANJAVUR - 613 403, TAMIL NADU.

limited literature is available on the mentioned topics, which makes it difficult to predict whether it would satisfy the conditions of designing lightweight or fireproof concrete.

Manufactured e-waste modified concrete performs better than using unmanufactured e-waste aggregate. However, an evaluation of the cost and environmental impact of preparing manufactured aggregates is missing. Therefore, a life cycle assessment of e-waste modified concrete should be conducted to see how its manufacturing affects social, economic, and environmental conditions. Such evaluation will enable concrete technologists to see if the environmental impact of e-waste may be diminished by using it as a supplement to coarse aggregates in concrete.

Most of the studies suggest that e-waste aggregates can be used to prepare non-structural members of a concrete structure. However, some researchers suggest that incorporation of e-waste increases durability and mechanical properties of concrete, which indicates that it has the potential to be used in preparing structural concrete. Moreover, a few studies also suggest that e-waste aggregate enhances the ductility of concrete as compared to conventional concrete, which indicates its ability to resist seismic loads. This should be studied more extensively to make the most of increasing e-waste worldwide.

A REPORT ON THE SEMINAR

To prepare the students for competitive examination, An Awareness session by external agency was conducted on campus. This was arrange for the interested students of all the disciplines.

Date: 05.05.2022

Venue: Silver jubilee Seminar Hall (CRD First floor)

Time: 3.00p.m to 4.30p.m

Audience: Interested Students (All Disciplines)

Resource person Details:

Dr.A.Mohan,

Assistant professor,

Urumu Dhanalakshmi college ,

Tiruchirapalli-620019

Photos of the session is given below.

Subject	Added New Topics
Engineering Mechanics	- Friction and its applications including rolling friction, belt-pulley, screw jack, wedge, vehicles, etc. - Frames; Lagrange's equation
Strength of Materials	- Shear Center
Machine Design	- Shafts
Fluid Mechanics	- Basics of Compressible Fluid Flow
Thermodynamics & Applications	- Steam and Gas Turbines
Production	Metrology and Inspection: - Concepts of Coordinate-Measuring Machine(CMM) Computer Integrated Manufacturing: - Additive manufacturing
IM & OR	- Lean Manufacturing

Section 1: Engineering Mathematics

Linear Algebra:

Matrix algebra, systems of linear equations, eigenvalues and eigenvectors.
Calculus: Functions of single variable, limit, continuity and differentiability, mean value theorems, indeterminate forms; evaluation of definite and improper integrals; double and triple integrals; partial derivatives, total derivative, Taylor series (in one and two variables), maxima and minima, Fourier series; gradient, divergence and curl, vector identities, directional derivatives, line, surface and volume integrals, applications of Gauss, Stokes and Green's theorems.

Differential equations:

First order equations (linear and nonlinear), higher order linear differential equations with constant coefficients, Euler-Cauchy equation; initial and boundary value problems, Laplace transform, solutions of heat, wave and Laplace's equations.

HOD

Department of Mechanical Engineering
Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
Institution Deemed to be University
U/s 3 of the UGC Act, 1956
THANJAVUR - 613 403, TAMIL NADU.

REGISTRAR,
Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act, 1956),
THANJAVUR - 613 403, TAMIL NADU.

DEAN

School of Engineering and Technology,
Ponnaiyah Ramajayam Institute of
Science and Technology (PRIST)
Deemed to be University
Vallam, Thanjavur - 613 403.

Complex variables: Analytic functions; Cauchy-Riemann equations; Cauchy's integral theorem and integral formula; Taylor and Laurent series.

Probability and Statistics:

Definitions of probability, sampling theorems, conditional probability; mean, median, mode and standard deviation; random variables, binomial, Poisson and normal distributions.

Numerical Methods: Numerical solutions of linear and non-linear algebraic equations; integration by trapezoidal and Simpson's rules; single and multi-step methods for differential equations.

Section 2: Applied Mechanics and Design

Engineering Mechanics:

Free-body diagrams and equilibrium; friction and its applications including rolling friction, belt-pulley, brakes, clutches, screw jack, wedge, vehicles, etc.; trusses and frames; virtual work; kinematics and dynamics of rigid bodies in plane motion; impulse and momentum (linear and angular) and energy formulations; Lagrange's equation.

Mechanics of Materials:

Stress and strain, elastic constants, Poisson's ratio; Mohr's circle for plane stress and plane strain; thin cylinders; shear force and bending moment diagrams; bending and shear stresses; concept of shear centre; deflection of beams; torsion of circular shafts; Euler's theory of columns; energy methods; thermal stresses; strain gauges and rosettes; testing of materials with universal testing machine; testing of hardness and impact strength.

Theory of Machines:

Displacement, velocity and acceleration analysis of plane mechanisms; dynamic analysis of linkages; cams; gears and gear trains; flywheels and governors; balancing of reciprocating and rotating masses; gyroscope.

Vibrations: Free and forced vibration of single degree of freedom systems, effect of damping; vibration isolation; resonance; critical speeds of shafts.

Machine Design:

Design for static and dynamic loading; failure theories; fatigue strength and the S-N diagram; principles of the design of machine elements such as bolted, riveted and welded joints, shafts, gears, rolling and sliding contact bearings, brakes and clutches.

Section 3: Fluid Mechanics and Thermal Sciences

REGISTRAR,
Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
Deemed to be University,
U/s 3 of the UGC Act, 1956,
THANJAVUR - 613 403, TAMIL NADU.

Department of Mechanical Engineering
Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
Deemed to be University,
U/s 3 of the UGC Act 1956,
Thanjavur - 613 403, Tamil Nadu.

DEAN
School of Engineering and Technology,
Ponnaiyah Ramajayam Institute of
Science and Technology (PRIST)
Deemed to be University
Thanjavur - 613 403.

Fluid Mechanics:

Fluid properties; fluid statics, forces on submerged bodies, stability of floating bodies; control-volume analysis of mass, momentum and energy; fluid acceleration; differential equations of continuity and momentum; Bernoulli's equation; dimensional analysis; viscous flow of incompressible fluids, boundary layer, elementary turbulent flow, flow through pipes, head losses in pipes, bends and fittings; basics of compressible fluid flow.

Heat-Transfer:

Modes of heat transfer, one dimensional heat conduction, resistance concept and electrical analogy, heat transfer through fins; unsteady heat conduction, lumped parameter system, Heisler's charts; thermal boundary layer, dimensionless parameters in free and forced convective heat transfer, heat transfer correlations for flow over flat plates and through pipes, effect of turbulence; heat exchanger performance, LMTD and NTU methods; radiative heat transfer, Stefan- Boltzmann law, Wien's displacement law, black and grey surfaces, view factors, radiation network analysis

Thermodynamics:

Thermodynamic systems and processes; properties of pure substances, behavior of ideal and real gases; zeroth and first laws of thermodynamics, calculation of work and heat in various processes; second law of thermodynamics; thermodynamic property charts and tables, availability and irreversibility; thermodynamic relations.

Applications: Power Engineering:

Air and gas compressors; vapour and gas power cycles, concepts of regeneration and reheat. *I.C. Engines:* Air-standard Otto, Diesel and dual cycles. *Refrigeration and air-conditioning:* Vapour and gas refrigeration and heat pump cycles; properties of moist air, psychrometric chart, basic psychrometric processes. *Turbomachinery:* Impulse and reaction principles, velocity diagrams, Pelton-wheel, Francis and Kaplan turbines; steam and gas turbines.

REGISTRAR,

Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act, 1956).
THANJAVUR - 613 403, TAMIL NADU.

DEAN

School of Engineering and Technology,
Ponnaiyah Ramajayam Institute of
Science and Technology (PRIST)
Deemed to be University
Vadam, Thanjavur - 613 403, Tamil Nadu

Section 4:

Materials, Manufacturing and Industrial Engineering Engineering Materials:

Structure and properties of engineering materials, phase diagrams, heat treatment, stress-strain diagrams for engineering materials.

Casting, Forming and Joining Processes: Different types of castings, design of patterns, moulds and cores; solidification and cooling; riser and gating design. Plastic deformation and yield criteria; fundamentals of hot and cold working processes; load estimation for bulk (forging, rolling, extrusion, drawing) and sheet (shearing, deep drawing, bending) metal forming processes; principles of powder metallurgy. Principles of welding, brazing, soldering and adhesive bonding.

Machining and Machine Tool Operations:

Mechanics of machining; basic machine tools; single and multi-point cutting tools, tool geometry and materials, tool life and wear; economics of machining; principles of non-traditional machining processes; principles of work holding, jigs and fixtures; abrasive machining processes; NC/CNC machines and CNC programming.

Metrology and Inspection:

Limits, fits and tolerances; linear and angular measurements; comparators; interferometry; form and finish measurement; alignment and testing methods; tolerance analysis in manufacturing and assembly; concepts of coordinate-measuring machine (CMM).

Computer Integrated Manufacturing:

Basic concepts of CAD/CAM and their integration tools; additive manufacturing.

Production Planning and Control:

Forecasting models, aggregate production planning, scheduling, materials requirement planning; lean manufacturing.

Inventory Control: Deterministic models; safety stock inventory control systems. **Operations Research:** Linear programming, simplex method, transportation, assignment, network flow models, simple queuing models, PERT and CPM.

CIRCULAR

SUB: GATE – 2021 Coaching Class – Reg

It is informed that GATE-2021 Coaching class will be started on 25.09.2020 for the academic year 2020-2021. The detailed schedule will be given by the departments.

Heads of the departments are requested to inform their students about the GATE-2021 Coaching class and motivate them to attend the class.

HOD's are requested to nominate one faculty member to co-ordinate the GATE Coaching class.

CIRCULAR

SUB: GATE - 2022 Coaching Class - Reg

It is informed that GATE-2022 Coaching class will be started on 03.08.2021 for the academic year 2021-2022. The detailed schedule will be given by the departments. Heads of the departments are requested to inform their students about the GATE-2022 Coaching class and motivate them to attend the class.

HOD's are requested to nominate one faculty member to co-ordinate the GATE Coaching class.

Competitive Examination Coaching

- ✓ The modules that are covered under this competitive programme.
- ✓ Students are gained good practice about the various kinds of problem solving
- ✓ The reports are provide the valuable activity and background information on the students performing aptitude, reasoning, problem solving.
- ✓ All microbiology teaching faculties also imparted and shared knowledge on aptitude activity and good experience to the students.

ABOUT SOFT SKILL DEVELOPMENT

In order to enhance the soft skills and employability skills of the students, value added courses such as Communication Skills, Business Communication, Personality Enhancement and Campus to Corporate are made an integral part of the curriculum of the students. The students are also counseled and motivated to become better citizens and advised to stand upright for social causes. To imbibe these qualities, they are encouraged to participate in activities for social and community service. The University also provides every student with the facility of undertaking an Inter-Disciplinary project so as to enhance their soft skills. Apart from this the students are provided Summer and Winter Internships, Exchange Programmes, Projects, Dissertations, Seminars, Group Discussions, Mock Interviews, Inter-disciplinary Projects, Team Activities, Community based activities, Placement Assistance via Corporate Resource Centre, Organizing activities to enhance their application skills, team building skills and entrepreneurial skills. Many conferences are also organized from time to time to enhance the knowledge and skills of students.

Many School level, Intra-University and Inter University events are organized from time to time for the holistic development of the students.

OBJECTIVES

- To develop and train the students to learn the soft skill and face the corporate world and have a successful professional career.
- To develop soft skills and communication ability to challenge the rigors of competitive tests and on-job-training in add-on or vocational courses.
- To arrange for various technical and career guidance related seminar/workshop to

TRAINING MODULES

B. Tech Students

BASIC BEHAVIORAL ETIQUETTE

YEAR : II-IV YEAR

Duration: 10 Hours

Training is mainly focused on discipline, grooming, career planning and building personality. As it is the first year of the university, students are given awareness about the job market right from the start so that they prepare accordingly at their own pace and potential.

Eliminating negative thought, developing enriching habits, unlocking individual potentials and well versed communication is the aim of this program. The module consists of

- Communication Skills, Goal Setting, Career Planning, Reaching your Potential, Time Management, Stress Management, Grooming and Discipline, Learning skills, Listening Skills

TECHNICAL, GENERAL APTITUDE AND SKILL SET DEVELOPMENT

Year : II YEAR

Duration : (10 HOURS)

The training is an extension of the 1st year training with assignments and tasks given based on individual topics. A practical exposure is given to realize the importance of the skillsets. Students are exposed to facing their fears and uncomfortable situations such as public speaking, job interview, group discussion etc. Team building and group activities are also performed to help students realize the benefits of working in a team for efficient productivity and cooperation.

- Attitudes, Technical Aptitude, General Aptitude, Quantitative Reasoning, Logical Reasoning, Verbal Reasoning, Group Discussion, Interview Skills, Assertiveness, Creativity

TECHNICAL TRAINING

Year : III Year

Duration: (10 Hours)

The objective of the training provided to the third year students is to exercise the student's brain and prepare them for technical skill. Some Basic software exposure is provide to them during this period. Based upon the student's

1. Technical aptitude session consists of C, C++, C#, JAVA, J2EE, CATIA, ANSYS, .NET, PRO-E, AUTO CAD, PRO- STADD, Solid Works, PLC-SCADA, VLSI and DSP.
2. Technical Training (JAVA, J2EE, CAD, QCAD, Pro-E, LaTeX, PHP & My SQL)
3. Technical Training (Programming fundamentals – C#, .NET, Hardware, Networking, Open Foam, OScad, Blender, Scilab, Python).
4. Auto CAD design and CATIA for Mechanical Engineers,
5. Auto CAD for Civil branches, Matlab, P-Spice, modeling and simulation of renewable energy system and IoT of things, for Electrical Engineers & Electronics and communication Engineers.

MOCK TEST & INTERVIEW

Year : IV

Duration: (10 – Hours)

Exclusive Pre-Placement Training – both General Aptitude and Technical Aptitude is carried out by External Training firms, Corporate Professionals for final year students, with a focus on the Corporate Selection Process during the Campus Hiring Visit

Mock Tests on Company Specific Aptitude Question papers are carried out along with Mock Interviews. Based on such companies face-to-face Technical & HR – interviewing style, and finally placement offer provide to the students.

Bridge Course

A bridging of gap is not limited to the academic arena. Understanding the institute culture and expectations engineering program on the part of the student also entails bridging of gap. Induction program is organized as an orientation activity every year for all the first year students to enlighten them about the electrical engineering and course expectations. This also helps them get acquainted with the culture and environment at the institute. It helps bridge the gap between students to campus and also provides a quick overview of campus to corporate connect. A Bridge program is a formal partnership between two post-secondary institutions that provides students with advanced standing in a degree program at one institution as recognition of previous academic experience in a similar field of study at another institution.

Remedial Coaching

Faculty members encourage and support students above and beyond the regular allocated lectures. Various requests by students pertaining to subject related queries, concept clarity, challenging topics and additional practice sessions are addressed by faculty members to enhance the efficiency of the students, help students in their areas of need and for students who have been unsuccessful in the examination.

RECENT TRENDS IN SMART GRID

PONNAIYAH RAMAJAYAM INSTITUTE OF SCIENCE & TECHNOLOGY

PRIST UNIVERSITY

Vallam, Thanjavur.

Date: 06.02.2021

Sir,

Sub: Two days' workshop conducted by Department of Electrical and Electronics Engineering.

I have the honour to invite your kind attention to participate two days' workshop in the title of "Recent Trends in Smart Grid" scheduled on 15.02.2021 & 16.02.2021. All are invited to participate and provide your support.

Thanking you.

With Regards

REGISTRAR,

Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act, 1956),
THANJAVUR - 613 403, TAMIL NADU.

training program on

**Recent Trends in Smart Grid
Technology**

(15th & 16th September, 2019)

Organized by

**DEPARTMENT OF ELECTRICAL AND
ELECTRONICS ENGINEERING PRIST**

**University,
Vallam, Thanjavur**

Email: eee.prist@gmail.com

About the Course

The rapidly increasing energy needs of our nation and the ever-growing generation demand gap necessitate the introduction of new technologies in power sector. Researchers from both industry and institutions have been working on the problem for a long period and are able to device feasible solutions.

In power grid, the traditional fossil fuels are facing the problem of depletion and the decarbonization demands the power system to reduce the carbon emission. Although the rising awareness of sustainable development have become the impetus to the utilization of renewable energy sources, the intermittent characteristics of wind and photovoltaic energies bring huge challenges to the safe and stable operation in a low inertia power system.

REGISTRAR,

**Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act, 1956),
THANJAVUR - 613 403, TAMIL NADU.**

The Smart Grid represents an unprecedented opportunity to move the energy industry into a new era of reliability, availability, and efficiency that will contribute to our economic and environmental health. During the transition period, it will be critical to carry out testing, technology improvements, consumer education, development of standards and regulations, and information sharing between projects to ensure that the benefits we envision from the Smart Grid become a reality. The benefits associated with the Smart Grid include:

- More efficient transmission of electricity
- Quicker restoration of electricity after power disturbances
- Reduced operations and management costs for utilities, and ultimately lower power costs for consumers
- Reduced peak demand, which will also help lower electricity rates
- Increased integration of large-scale renewable energy systems
- Better integration of customer-owner power generation systems, including renewable energy systems
- Improved security

It is earnestly hoped that such a forum will enhance the knowledge and perspective of both students and research scholars in the area of power systems while providing great opportunities for collaborative research.

On each topic, there will be presentations on the principles and concepts involved as well as case studies, quizzes, followed by practical sessions demonstrating the exposure of the participants to fold actual experience on the renewable energy system with software tools.

About PRIST University

Ponnalyah Ramajayam Institute of Science and Technology is a university recognized by U/S 3 of UGC Act, 1956. It is situated at 42 km from Tiruchirappalli and 15 km from Thanjavur, along the National Highway 67. Accredited by NAAC the university spreads over five campuses establishing the academic excellence and deliverance to the society in the form of Graduates, Post Graduates and professionals.

Under the able guidance of its founder and Chancellor Prof. P. Murugesan, the University is poised to establish academic Excellence with quality education. It is situated in temple city, Thanjavur, the pinnacle of glorious Chola dynasty vis-à-vis fast developing smart city and yet agrarian set-up, the university offers a classical blend of technology, culture and ethics.

Department of Electrical and Electronics Engineering

The department of Electrical and Electronics of PRIST UNIVERSITY was established in 2008. Since then its excellence in each and every aspects has played an important role in the institute. The department received university status under section 3 of UGC Act 1956. The EEE Department is dedicated to delivering competent electrical engineers to the arena of the real world. They are outfitted with core technical knowledge as well as professional skills necessary to face the challenges of the future. The communication facility and staff are fully geared-up towards the students.

REGISTRAR,
Ponnalyah Ramajayam Institute of
Science & Technology (PRIST)
(Institution Deemed to be University
under UGC Act, 1956).
THANJAVUR - 613 403, TAMIL NADU.

modern and sophisticated equipment at both Undergraduate (UG) and Postgraduate (PG) levels to provide quality education with practical knowledge.

Boarding and Lodging Facilities

Workshop venue is Vallam, Thanjavur, PRIST University. There are limited student hostel rooms available for both male and female.

Registration fees

Registration fee - Rs 500.00

Registration fee includes refreshment and lunch, a kit, a course material and a certificate.

Eligibility

Research scholars (Full Time / Part Time), UG/PG students of various engineering/science discipline, faculty members pursuing (or interested in pursuing) doctoral research.

Registration Details:

Registration will be done on first come first serve basis.

Number of seats are 50. Registration will be closed once the target participants are reached.

The enclosed registration form is to be filled and mailed/emailed (scan copy of registration form along with payment details) to the following communication address:

Sir,

Sub: Two days' workshop conducted by Department of Electrical and Electronics Engineering.

I have the honour to invite your kind attention to participate two days' workshop in the title of "Recent Trends in Smart Grid" scheduled on 23.09.2021 & 24.09.2021

All are invited to participate and provide your support.

Thanking you.

With Regards

REGISTRAR,

Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act. 1956),
THANJAVUR - 613 403, TAMIL NADU.

Two day National Workshop cum hands-on
training program on

**Recent Trends in Smart Grid
Technology**

(23th & 24th FEBRUARY, 2021)

Organized by

**DEPARTMENT OF ELECTRICAL AND
ELECTRONICS ENGINEERING PRIST**

University,
Vallam, Thanjavur

Email: eee.prist@gmail.com

About the Course

The rapidly increasing energy needs of our nation and the ever-growing generation demand gap necessitate the introduction of new technologies in power sector. Researchers from both industry and institutions have been working on the problem for a long period and are able to devise feasible solutions.

In power grid, the traditional fossil fuels are facing the problem of depletion and the decarbonization demands the power system to reduce the carbon emission. Although the rising awareness of sustainable development have become the impetus to the utilization of renewable energy sources, the intermittent characteristics of wind and photovoltaic energies bring huge challenges to the safe and stable operation in a low-carbon power system.

REGISTRAR,

Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act, 1956),
THANJAVUR - 613 403, TAMIL NADU.

The Smart Grid represents an unprecedented opportunity to move the energy industry into a new era of reliability, availability, and efficiency that will contribute to our economic and environmental health. During the transition period, it will be critical to carry out testing, technology improvements, consumer education, development of standards and regulations, and information sharing between projects to ensure that the benefits we envision from the Smart Grid become a reality. The benefits associated with the Smart Grid include:

- More efficient transmission of electricity
- Quicker restoration of electricity after power disturbances
- Reduced operations and management costs for utilities, and ultimately lower power costs for consumers
- Reduced peak demand, which will also help lower electricity rates
- Increased integration of large-scale renewable energy systems
- Better integration of customer-owner power generation systems, including renewable energy systems
- Improved security

It is earnestly hoped that such a forum will enhance the knowledge and perspective of both students and research scholars in the area of power systems while providing great opportunities for collaborative research.

On each topic, there will be presentations on the principles and concepts involved as well as case studies, quizzes, followed by practical sessions demonstrating the exposure of the participants to fold actual experience on the renewable energy system with software tools.

CIRCULAR

SUB: International Science Day Celebration

It is informed that a International Science Day Celebration be arranged by the Department of Civil Engineering on 01.02.2023 for the academic year 2022-2023. Heads of the departments are requested to inform their students about the International Science Day Celebration and encourage them to attend the program. HODs are also requested to nominate one faculty member to co-ordinate the same.

THANJAVUR - 613 403, TAMIL NADU.

DRAN
Dean,
School of Engineering and Technology
Ponnaiyah Ramajayam Institute of
Science and Technology (PRIST)
Deemed to be University
Thanjavur - 613 403.

S.No	Name of the Event	No. of Participants
1	Poster Design	30
2	Video Making	10
3	Drawing	15
4	Aptitude Test	35

On the Occasion day, Around 300 Students and 40 Staffs are participated in the event and we invited **Mr.T.V.Christy** Sir, Vice Chancellor of PRIST Deemed to be University, Thanjavur as Chief Guest. And also invite a Special Person of PRIST E&T Dean **Mr. R.Tamizhselvan** Sir and PREC Principal **Dr.C.RajiniKanth** Sir to address the celebration.

On Program started with invocation song followed by Welcome address commenced by Mr. Dev Akash, Student. After that we are conducting 'Speech Competitions' followed by Connection game.

On Speech Competitions 7 students are participate. On that 2 winners are selected for English & Tamil. 2 winners for Tamil Speech have to be selected.

P. Anirudh
 Head of the Department
 Electrical and Electronics Engineering
 Ponnaiyah Ramajayam Institute of
 Science & Technology (PRAIT)
 Institution Deemed to be University
 U/s 3 of the UGC Act, 1956
 THANJAVUR - 613 403, TAMIL NADU

Ramajayam
 DEAN
 School of Engineering and Tech
 Ponnaiyah Ramajayam Institute of
 Science and Technology (PRAIT)
 Deemed to be University
 Valam, Thanjavur - 613 403.

For connection program there will be a 5 Teams. In each team there are 5 members. Four round of competition have been conducted. Each question have 10 Marks in case of pass question there will be addition of 5 Marks. At end of connection Game Civil Department scored 35 Points , CSE department scored 30 Points, Mechanical with 20Points and EEE&ECE scored 10points. As the end of this session CIVIL is declared as winner and CSE is declared as Runner of the Competition.

Engineer's day was addressed by Honourable Vice Chancellor Sir. He encouraged students about day to day technological activities.

And also motivated the students to participate in all technical and non technical events conducted in all over the world.

Finally honouring all the winners by giving the rewards to those who are got first two places.

The function concluded with a vote of thanks and National Anthem.

“Engineering is not merely knowing and being knowledgeable; engineering is not merely analysis; engineering is not merely the possession of the capacity to get elegant solutions to non-existent engineering problems; engineering is practicing the art of the organized forcing of technological change.” The Theme of the event has to be attained.

Learning programming and app development through repetition can be a very effective technique.

There are a number of ways we can control a loop. By reaching a count, for instance. If the player is to get three chances, then the count is three. This is known as a finite loop. Or we can allow for a breaking condition within the loop, such as an option to quit. Until the user initiates this condition, the loop runs indefinitely. This is known as an infinite loop.

In this competition, five different teams namely Team A, Team B, Team C, Team D and Team E, with two participants in each team give tough battle to each other.

Rules and regulations of the quiz were explained at the beginning. It was interesting two-round competition, including objective questions with options round, which engaged the students for one hour.

The students showcased their brilliance by rapidly answering the questions. Though some of the questions were very tricky, the teams tried to answer them with confidence.

Although the teams participated actively, the Team A that scored the most. It was very informative and knowledge enriching competition for the participants along with the audience.

The lesson here is to never run code that you haven't first either saved or copied and pasted into a text editor. Learn this lesson now, or learn it later, the hard way. It's our choice.

Minutes of the programme:

Programme Name: Vision Quest

Date: 20.04.23

Venue: PRIST Block Seminar hall , PRIST University, Thanjavur

Time: 10.am

Dignitaries on Dais:

Resource person: Dr. S.Subramaniam Head the Department of Mathematics
Dr. L. Chinnappa, Dean School of Arts and Science.

The programme started with welcome address given by Mr.S.Rasakumar, Assistant professor of English. Followed that valuable speech was given by our Dean, school of Arts and science Dr. L. Chinnappa. Dr. S.Subramaniam, Head the Department of Mathematics was the resource person of the programme. He gave a lecture on Vision Quest. The programme reflected the role of spirituality and contemplative thinking in Indigenous cultures. He provided an important connection between the participants.

The resource person was taken the session powerfully revealed the purpose of the program was to review performance of the team and set goals with a fresh perspective and larger vision. The program includes training in the skills of awareness, spiritual protection, and the second level of quest, direct experience with holding protection for a real Vision Quest plus group and individual process. Dr.S.Subramaniam made a magnificent training programme which makes the students to participate in most interesting way. This training will enable people to build a program based business as a Vision Quest facilitator in their local community. The programme ended with the note of vote of thanks proposed by Prof. K.Veenai Muthu Assistant professor of Tamil.

Minutes of the programme :

Programme Name: Creative Writing competition

Date: 11.01.2023

Venue: PRIST Block Seminar Hall, PRIST University, Thanjavur

Time: 10 am to 11 am

Dignitaries on Dais:

Judge- Dr. A.Usha, Dean, Student affair

Dr. L. Chinappa, Director Admission, Dean School of Arts and Science

HOD'S of various Departments

The programme started with welcome address given by Dr.R.Iniyavan, Head the Department of English. Followed that grand speech was given by our Dean, School of arts and science Dr. L. Chinappa. Dr.A.Usha, Dean, Student affair was the judge of the competition 'Creative Writing on Nature in literature'. Who motivated the students inaugurate the auspicious function. The intention of the event is express creative writing skills from the students. It inspired students to use their imagination to bring bags of personality and flair to their work. It focused on more traditional, technical forms of writing, like journalistic and academic styles, but instead displays imagination and invention. Students were participated in essay writing, drawing, story writing, poem writing, and making handicrafts things and won prizes. The programme ended with the note of vote of thanks proposed by Prof. J.Subarna

Date: 16.08.2022

The department of Biochemistry is pleased to inform that, we are planned to organize a science carnival event on 22nd August 2022. In this regards, we invite all students and faculty members to participate and make the function a grand success.

The aim of the Science Carnival is to provide an opportunity for the students to showcase their aesthetic ideas, passion and creative innovations as well as ignite the minds of the students in the field of Science and Technology. We invite the students to participate their Science project ideas on Life Science in the following events

- Science Lectures
- Scientific Exhibition
- Hands-on-training - Phytochemical analysis
- Rangoli

REPORT FOR SCIENCE CARNIVAL EVENT

Department of Biochemistry, Ponnaiyah Ramajayam Institute of Science & Technology [PRIST], organized the Science Carnival-2022 on August 22, 2022 in Seminar hall-II, CRD.

The dignitaries on the dais were Dr. L. CHINNAPPA, Ph.D., Dean, School of Arts and Science, Dr. A. Bakrudeen Ali Ahmed, Ph.D., Professor and Scientist, Department of Biochemistry PRIST, Dr. S. Ambiga, Head, Department of Biochemistry, PRIST, Dr. A. NOORJAHAN, Ph.D., Research Director and CEO, Biofocus Scientific Solutions Pvt. Ltd., Kumbakonam, and Dr. S. Sathishkumar, Assistant Professor, Department of Biochemistry, PRIST.

The programme started at 09:00 am with the welcome address by Dr. A. Bakrudeen Ali Ahmed, Ph.D., Department of Biochemistry. Dr. L. CHINNAPPA, Ph.D., Dean, School of Arts and Science delivered an Inaugural address about the Science and Technology today. Dr. S. Ambiga, Head, Department of Biochemistry introduce the Guest. Dr. A. NOORJAHAN, Ph.D., Research Director and CEO, Biofocus Scientific Solutions Pvt. Ltd. delivered the invited talk about the science in daily life.

Finally Dr. S. Sathishkumar, Assistant Professor, Department of Biochemistry delivered vote of thanks.

Sub: Role of Engineering for Sustainable Environment-reg.,

It is hereby informed that Program on Role of Engineering for Sustainable Environment will be conducted on 15.09.2022 (Thursday).

We cordially invite all students and teaching staffs to attend their event.

REGISTRAR,

Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University

PRIST DEEMED TO BE UNIVERSITY

ABOUT THE INSTITUTION

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

REGISTRAR,

Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act, 1956),
THANJAVUR - 613 403, TAMILNADU.

Role of Engineering for Sustainable Environment

There are several reasons why manufacturers should focus on sustainable engineering:

- To reduce overall CO2 emissions
- To minimize energy & materials consumption, which increases operational efficiency by reducing costs
- To build in recyclability and reuse, which optimizes the top and bottom line
- To improve company culture, employee engagement, and customer satisfaction
- To increase competitive advantage, strengthen the brand, and build public trust
- To compete in markets with strict environment, health, and safety regulations

Use resources effectively

When designing products, engineers should make sure non-renew resources are properly and sparingly used in the manufacturing ph. reduce depletion and minimize waste.

Eliminate excess waste

PLM for green engineering enables you to utilize digital thread capabilities to support sustainability initiatives. You can design, visualize, develop, and test products in the digital realm as opposed to doing it in the physical world, avoiding scrap and waste.

Consider material alternatives

When sourcing parts, it's important to consider suppliers that offer sustainable options such as recycled or reused materials.

RESOURCE PERSON

Dr. D. Vincent Herald Wilson,

Professor - VIT

DATE : 15.09.2022

Role of Engineering for Sustainable Environment

Dr. D. Vincent Herald Wilson explained all the processes that were involved in "Role of Engineering for Sustainable Environment". A number of excellent colleges and universities are building environmental studies into their curricula for both bachelor's and master's programs, including Stanford University, the University of California at Berkeley and Carnegie Mellon University. That number is growing as schools increasingly realize that engineering design parameters (e.g., ambient temperature, sea level, storm intensity, droughts, volcanic activity, earthquakes and flooding) will be different in the years to come. Years of unsustainable practices have made those design assumptions unpredictable. Mining, oil drilling, gas exploration and overconsumption of those resources combined with pollution, such as greenhouse gas emissions, have taken a toll on the Earth's natural resources. Therefore, significant changes in resource availability have resulted, and infrastructure must be redesigned to operate safely in this new environment. Resource availability and environmental operating conditions are evolving. Engineers who understand how those changes will impact engineering projects are in demand now and for the foreseeable future.
