

## PONNAIYAH RAMAJAYAM INSTITUTE OF SCIENCE & TECHNOLOGY (PRIST)

Declared as DEEMED-TO-BE-UNIVERSITY  
U/s 3 of UGC Act, 1956

### 7.1.4 Water conservation facilities available in the Institution

#### 3. Construction of tanks and bunds:

In our institution tanks are constructed in all areas. The storage tanks situated at various locations of the institution are pumped with ground water. We have a separate tank system for drinking as well as bore water for the convenient usage. Water from the water bodies are collected through the pipes and stored in the tank (at every block). Maintenance department of the institution taking responsible for cleaning the tanks regularly as per the Government norms. The proper Bunds are constructed and used for retaining the water, creating obstruction and thus to control erosion. Bunds can be used to hold rainwater in lightly sloping plains and to ensure that bunds continue to provide the necessary protection against leaks and spills etc. Hence bunds should be assessed periodically to ensure that they continue to provide sufficient integrity around the campus.
